

2010 Tennessee Certified Arboreta List

Level 1 Arboreta: East Tennessee (13)

American Museum of Science & Energy Certified 2001
All around the campus of the Museum one can find the arboretum, which consists of 30 different species of trees. The arboretum is located off of South Tulane in Oak Ridge, Tennessee. For more information call the Museum at 865-516-3200.

The Bonny Oaks Arboretum Certified 2000
Located on Adamson Circle off Bonny Oaks Dr. in Chattanooga, this arboretum sits on eight acres and includes over 55 different species of trees, shrubs and ground covers. This site also includes the Dent House (listed on the National Historic Register) and the Chattanooga Church. For more information call 423-855-6113.

Burchfiel Grove and Arboretum Certified 2002
Located off of Hardin Lane in Sevierville, this arboretum is a part of the greenway system that runs along the Little Pigeon River. One can find over 30 different species of trees and numerous species of shrubs labeled all along the trail. For more information contact the Sevierville Parks & Recreation Department at 865-453-5441.

The Cherokee Trail Arboretum Certified 2000
This arboretum is part of the North Chickamauga Greenway on the TVA Chickamauga Reservation in Chattanooga. The arboretum includes a small wild area noted for its scenic, wildlife and recreational values. For more information contact 423-757-5167.

Cherokee Trail of Audubon Acres Certified 2003
The arboretum is located on 130 acres in the East Brainerd neighborhood of Chattanooga. The trail identifies trees not only with their common and botanical names but also with their Cherokee Indian names and uses. Audubon Acres is open daily to the public and offers the community a peaceful, quiet place to experience nature in the midst of heavy urbanization. For more information contact 423-892-1499.

Cleveland State Community College Certified 2006
This arboretum includes the grounds of the college and contains the only known Coast Redwood growing in Tennessee. The objective for this arboretum is to

provide an outdoor learning classroom for biology students and to provide a self-learning activity for the greater community served by Cleveland State. For more information contact the college at 423-473-2342.

Ivan Racheff House and Gardens

Certified 2003

The arboretum is an example of how a dump and one man's vision can be turned into an oasis for urban dwellers. Ivan Racheff purchased the Knoxville Iron works in the early forties and dreamed of a garden growing in place of the rubbish and garbage that was on site. Through the years his garden grew and in 1970 was given to the Tennessee Federation of Garden Clubs to maintain. For more information on this Knoxville arboretum please call 865-522-6210.

New Hopewell Elementary School Arboretum

Certified 2003

The arboretum is located in the wooded area behind the school along their nature trail. The trail was created and is maintained by the Science Club students and teachers. Visitors are welcome but are encouraged to sign in prior to viewing the grounds. For more information on this Knox County School please contact 865-579-2194.

Ocoee Regional Nature Center

Certified 2001

Once the Bradley County Landfill, this arboretum encompasses eight acres of land and over 30 different species of labeled trees. The nature center is a project of the Cleveland/Bradley County Keep America Beautiful Office. For more information contact 423-559-3307.

The Sevier County High School Nature Trail

Certified 2000

This arboretum is located on the nature trail within the school campus in Sevierville. This 1.2-mile long trail transverses the campus and includes a meadow and a garden. Visitors are welcome but are encouraged to sign in prior to viewing the grounds. For more information contact the school at 865-453-1076.

South-Doyle Middle School Nature Trail

Certified 2003

The purpose of the nature trail at this Knox County School is to provide an additional resource for outdoor education. The trail begins at the rear of the school near the Technology Lab and extends through the wooded portion of their campus. The students researched the plants and animals that are located around their school and created titles that visitors can observe. Visitors are welcome but are encouraged to sign in prior to viewing the grounds. For more information contact the school at 865-579-2110.

Steele Creek Park Tree Trail

Certified 2003 Re-certified 2008

Visitors of this Tree Trail in Bristol can expect to see native trees growing along an easy-to-walk trail that extends for one-half mile. The interpretive signs encountered will identify the tree, provide a picture of the leaf and provide information about the tree. For more information about the Tree Trail contact 423-764-4023.

Walters State Community College

Certified 2006

The nature trail was initially developed as a hands-on project for students in botany and landscaping classes. It continues to serve this purpose but is open to the general public as well. Although not required of a Level 1 arboreta, a map if the labeled trees are available. For more information contact the college at 423-585-2644.

Level 1 Arboreta: Middle Tennessee (14)

The Belle Meade Plantation Certified 2000
Located at 5025 Harding Road in Nashville, this arboretum encompasses 30 acres and sponsors a tree walk for school children and scout troops. For more information call 615-356-0501.

Brentwood Library Certified 2008
Part of the actual library grounds, this arboretum is located on a 40 acre site originally owned by the Bradley family. During construction of the library in 1997, remains of an ancient town dating from A.D. 1375 were discovered and verified by the Tennessee Division of Archaeology. In 2003, the Tree Committee planted a pecan seedling grown from seed from Washington's home at Mt. Vernon. For more information call 615-371-0060.

Cheekwood Botanical Garden & Museum of Art Certified 2001
Once the private estate of the Cheek family, the arboretum is located on 55 acres. It includes a wildflower garden, color garden, boxwood garden, woodland sculpture trail, herb garden, perennial garden, Japanese garden, water garden and more. Over 130 different tree species present in this Nashville arboretum. For more information contact the gardens at 615-353-2148.

Couchville Lake Trail Certified 2008
This arboretum is a two mile-paved trail that encircles the 110 acre Couchville Lake at Long Hunter State Park and is the centerpiece of the 3000 acre park. All of the tree species in this level I arboretum occur naturally in this area and were not planted. For more information call 615-885-2422.

Dickson Community Nature Trail Certified 2004
A walk in the woods best describes this nature trail and arboretum. This arboretum exists through the efforts of a local girl scout troop that planted trees, defined the trail, labeled trees, built and installed blue bird boxes, and planted wildflowers, and arranged for several small bridges to be built. For more information contact 615-446-2226.

The Gerald D. Coorts Memorial Arboretum Certified 2000
Situated on the campus of Tennessee Technological University in Cookeville, this arboretum contains 60 different species of trees. For more information call 931-372-3288.

Harpeth Hall School Certified 2005
The objective of this arboretum is to provide green space in the urban environment and provide educational opportunities for horticultural sciences and

independent study of tree identification. Visitors are welcome but are encouraged to sign in prior to viewing the grounds. For contact information call 615-292-6009.

The Hermitage Arboretum

Certified 2003

The Hermitage is located on 1,120-acre site in Nashville, which includes the entire antebellum cotton plantation of Andrew Jackson. The identified and labeled trees are along the 1.5-mile trail from the Visitor's Center to the Mansion, the first Hermitage, and the slave field quarters. It is thought that a few of the trees date back to the time of Andrew Jackson. For more information contact the Hermitage at 615-889-2941.

The Hillsboro West End Arboretum

Certified 2000

This Nashville arboretum is located over the three properties of Fannie Mae Dees Park, Eakin Elementary and Harris Hillman School. Thirty trees are labeled for educational purposes. For more information call 615-292-4519.

The Interstate Packaging Arboretum

Certified 2000

Located in White Bluff on the property of the Interstate Packaging Company, this site includes a 25,000 sq. ft. lake and over 60 different species of shrubs and trees. For further information contact Interstate Packaging at 615-797-9000.

Obed River Park

Certified 2004

This trail is a two-mile-long paved walk and follows a portion of the Obed River for over half its length. In addition to viewing the labeled trees, visitors can view the Tennessee Central Railroad trestle and Harrison and Mitchell dam historic sites, as well as rock formations, foot bridges, wild flowers and wildlife. For more information call 931-788-6055.

Old Hickory Lake Arboretum (Environmental Study Area)

Certified 2001

Adjacent to Old Hickory Lake are 23 acres that make up the Environmental Study Area. Over 60 different species of shrubs and trees have been planted off of Walton Ferry Road to attract diverse wildlife species. For more information contact the U.S. Army Corps of Engineers at 615-822-4846.

Pleasant Run Creek Arboretum

Certified 2004

This combination arboretum and memorial tree grove follows Pleasant Run creek just east of downtown Pulaski. Its mission is to provide creek bank protection, wildlife enhancement, as well as a tree identification educational opportunity. 44 trees are labeled and there are plans and opportunities to label additional specimens. Pulaski's mayor plays an active role in maintaining and developing this arboretum. For more information contact 931-363-2249.

The Stones River Greenway Arboretum

Certified 2003

The Murfreesboro Arboretum is located along the scenic Stones River Greenway system. It is composed of tree species that are native to the area, and many of the examples in the arboretum are original to the site. The greenway and adjoining arboretum are accessible to the public through several easily identifiable locations throughout the city. For more information contact the city at 615-895-8059.

Level 1 Arboreta:

West Tennessee (9)

Chimneyrock Elementary School Arboretum

Certified 2003

Virtually the entire 25-acre campus, in Cordova, is covered with their extensive outdoor classroom, which includes gardens and their arboretum. The philosophy of Chimneyrock is that students, teachers, staff and administrators, parents and community members should share the responsibility for providing a learning environment, which supports the school-wide focus on environmental awareness. Visitors are welcome but are encouraged to sign in prior to viewing the grounds. For more information contact Chimneyrock at 901-765-2316.

Chucalissa Tree Trail

Certified 2008

Situated high on fourth Chickasaw bluff of the Mississippi River, Chucalissa is a national historical landmark owned and administrated by the University of Memphis. The site contains the C.H. Museum, the remains of ancient mounds, archaeological trenches and an interpretive trail. Evidence indicates that the first Indian town was established around the year 1000 A.D. For more information call 901-485-3748.

Dyersburg Okena Park

Certified 2005

A tornado in 2004 almost derailed this arboretum when it damaged and destroyed several trees. The hub of recreation activities for the Dyersburg community, this park contains a one-mile walking trail with various trees labeled for easy viewing from the trail. For more information contact 731-285-6420.

Lichterman Nature Center

Certified 2003

The arboretum is located on 65 acres in the heart of Memphis. The nature center provides “hands-on” educational opportunities for both adults and children in tree identification, tree selection, ecological succession, etc. The arboretum allows visitors the opportunity to see trees in their native habitat including forest, meadow and aquatic habitats. The nature center is open 7 days a week. For more information contact 901-767-7322.

Old Forest Arboretum of Overton Park

Certified 2002

The 150 acres of the Old Forest Arboretum offers visitors and residents the opportunity to experience the original landscape and habitats of the Memphis area before West Tennessee was settled. Park Friends provide users with a self-guiding trail map and provides monthly hikes (except July and August) for all those interested in learning more about the trees. The arboretum is the home of the national champion Shumard Oak. For more information contact 901-276-1387.

Peterson Lake Nature Center

Certified 2008

As the most visited park in Collierville and home to historical Johnson Lake, this arboretum sports a nature trail and boardwalk among an enormous amount of virgin woodlands that will eventually be expanded to Wolf River. For more information call 901-853-3215.

Sea Isle Park and School Certified 2004
Thirty-Eight different species are identified in this arboretum. Located next to the school in Sea Isle Park, this site is used extensively by classes from Sea Isle School. Visitors can also experience a variety of open space, recreational facilities and woodland settings. For more information call 901-682-9551.

Memphis City Beautiful Victorian Village Arboretum Certified 2004
This arboretum is a composite of 8 different sites in close proximity to each other, all within the Victorian Village Historic District. In addition to 40 species of trees, visitors can also enjoy historic architecture of the homes in the area. For more information call 901-522-1135.

Zadie E. Kuehl Memorial Park Certified 2004 Re-certified 2009
This park is named in memory of Zadie E. Kuehl, a six and one-half month old child killed by a drunk driver. Through organ donation, Zadie gave the gift of life to four children and one adult. The arboretum sports 40 species of trees that are labeled and contains a mix of recent plantings and more mature trees. For more information call 901-867-2717.

Level 2 Arboreta: East Tennessee (2)

Chattanooga State Technical College Certified 2008
This arboretum boasts 65 different species of trees on the main campus of the college on 55 acres. The campus is the sole remaining slough left over from the channelization of the Tennessee River, with a large flood control pond and some wetlands creating varied conditions for trees to grow. For more information call 423-697-4466.

Daniel Boone Arboretum Certified 2003 Re-certified 2006
The arboretum is located along a portion of the Daniel Boone Greenway, a walking/biking trail in Harrogate. Along the greenway, one can find over 60 different species of native trees labeled and learn about their habitat and uses. The arboretum is a project of the Harrogate Tree Board in cooperation with Lincoln Memorial University, and moved from Level 1 to Level 2 in 2006. For more information contact Steve Roark at 423-526-2992.

Level 2 Arboreta: Middle Tennessee (2)

Deerwood Arboretum and Natural Area Certified 2002
Originally used by the City of Brentwood as a wastewater treatment plant, the Deerwood Arboretum is located on a 27-acre site that borders the Little Harpeth River. There are over 60 tree species located along paved and unpaved walking trails. A pamphlet is available on site for arboretum users wanting to take a self-guided tour. For more information contact the Brentwood Parks & Recreation Department at 615-371-2208.

McMinnville Civic Center Certified 2006
In the heart of the Tennessee nursery industry, this arboretum boasts 70 different labeled species of trees and is a valuable asset and extension of nursery

trade shows that use the civic center. The arboretum follows a walking trail that provides exercise while viewing the trees. The map is available at the Civic Center and at various points along the trail. For more information call the Civic Center at 931-473-1212.

Level 2 Arboreta: West Tennessee (7)

The Carlisle S. Page Arboretum Certified 2000
This arboretum is located within Historic Elmwood Cemetery in Memphis and contains over 60 different species of trees. The arboretum is named after a long-time supporter of the Cemetery who personally planted hundreds of trees in the arboretum. Handouts are available to visitors about the trees in Elmwood, and there are opportunities for special programs regarding the trees. For more information contact the Cemetery at 901-774-3212.

Dixon Gallery and Gardens Certified 2006
On this 17-acre site visitors can find a mix of forest and landscape garden settings. Sixty species of trees are identified. Maps for self-guided tours are available at the ticket booth. The diversity of trees and companion shrubs creates interest in every season. For more information, call 901-761-5250.

Dyersburg Middle School Certified 2005 Re-certified 2008
An Eagle Scout project spawned this arboretum as a level I and is was another Eagle Scout project that upgraded it to a level II. Located Northwest of the school, approximately 66 species were identified to help classes and the public learn their trees. The paved walking trail also includes hundreds of perennials along its path. Visitors are welcome but are encouraged to sign in prior to viewing the grounds. For more information, call 731-286-5351 or 731-286-3625.

The Louise Pearson Memorial Arboretum Certified 2002 Re-certified 2006
The arboretum, a project of the Bells Garden Club, is located on the five-acre Green Frog Development Area in Crockett County. The goal of the arboretum and the surrounding village is to reflect the natural informal beauty of the old-time rural South. Currently over 70 different tree species are labeled. This site moved from Level 1 to Level 2 in 2006. For more information contact the arboretum at 731-663-3319.

Trees by Touliatos Arboretum Certified 2002
In order to better educate the public, the arboretum was created to provide an opportunity for people to see mature specimens when they are making a decision about tree selection and placement. Over 60 species of trees and numerous cultivars grow on the 5-acre site in Memphis. Arboretum visitors are provided with a map showing the location of each tree. For more information contact Trees by Touliatos at 901-346-8065.

University of Memphis Certified 2004 Re-certified 2008
Many calls over the years asking “What is this tree?” or “May my children collect leaves for their school project?” prompted the development of the University of Memphis arboretum into a level II with 67 species of trees. In the middle of

Memphis, the campus provides a green oasis in the state's largest city. For more information call 901-678-3511.

University of Tennessee W. TN Research Center Certified 2006
Originally started as a shade-tree demonstration project, the plantings have now become incorporated into the arboretum. The goal is to provide a site for students to collect leaf samples for school projects and for 4-H and FFA contests. Maps for self-guided tours are available from the office. For more information about this arboretum, contact the Research Center at 731-425-4751.

Level 3 Arboreta: East Tennessee (1)

University of Tennessee Trial Gardens Certified 2003
The UT Gardens are located off Neyland Drive on the University of Tennessee Agriculture campus in Knoxville. The gardens, which cover 10 acres, are open and free to the public. The mission of the gardens is to enhance visitors' lives with plants through field research, plant demonstrations and education. For more information about the Gardens contact the Plant Sciences Department at 865-974-7324.

Level 3 Arboreta: West Tennessee (1)

Central Gardens Neighborhood Certified 2008
Located in the heart of Memphis on 311 densely forested acres, this arboretum is part of a century-old historic neighborhood that encompasses three grade schools, multiple churches and a police station. Many of the trees are well over 80+ years and this arboretum has well over the 90 different species of trees needed to be considered a level 3. For more information call 901-725-1201.

Level 4 Arboreta: East Tennessee (3)

East Tennessee State University (ETSU) Certified 2002
The ETSU arboretum encompasses the entire 366-acre campus of the university and is located in Johnson City. The arboretum contains over 135 species of trees representing 6 families of conifers and 33 families of angiosperms, and include trees from Asia, Europe, and North America. Pamphlets are available for self-guided tours, and visitors can also take a self-guided audio tour. For more information contact the ETSU Biology Department at 423-439-8635.

Reflection Riding Arboretum & Botanical Garden Certified 2002
Reflection Riding's 300 acres consists of a three-mile driving loop and a twelve-mile network of hiking trails. Hundreds of labels identify many of the over one thousand different species of trees, shrubs, wildflowers and grasses. Rustic signs tell of the geology, history and botany of the area. For more information on this Chattanooga arboretum call 423-821-9582.

UT Forestry Experiment Station & Arboretum Certified 2001
The 250-acre research and educational arboretum has over 2,500 native and exotic woody plant specimens that represent over 800 species, varieties and

cultivars. Located in Oak Ridge, this arboretum provides a natural laboratory for studies in plant uses, genetics and adaptability, insect and disease control, and the management of associated natural resources. For more information contact the arboretum at 865-483-3571.

Level 4 Arboreta: West Tennessee (1)

Memphis Botanic Garden

Certified 2006

The Memphis Botanic Garden is one of the Mid South's premiere attractions. Situated on 96 acres in the heart of Memphis, the Garden attracts over 130,000 visitors annually. Its many gardens within the Garden feature many species and variety of trees, including 85 varieties of magnolia, and a conifer collection that includes a Chinese water pine. The Botanic Garden may be contacted by calling 901-685-1566.
